

Suntrap Book Review

Caterpillar, Butterfly

By Vivian French, illustrated by Charlotte Voake

Published by Walker Books £7.99 (p/b)

Age range: Five years old upwards

Description

Watch a caterpillar metamorphose into a butterfly in this fun, informative, award-winning picture book, part of the *Nature Storybooks* series.

Curious young minds will love discovering each stage in the journey, from wriggly green caterpillar to the beautiful butterfly, in this picture book which combines story with information.

Reviews

'Charming and very informative... good natural history' Books for Keeps

'Loved this book. Great for ks2 to explain the lifecycle of a butterfly. Filled with facts and a lovely storyline. I love how the author has combined fiction and non-fiction. Great illustrations to accompany the text too!'

'The life cycle from egg to caterpillar to butterfly is exquisitely described in this book in the form of a story.'

A girl learns from her grandfather where to look for caterpillar eggs and watches them grow in the garden. The book provides detailed information on the different types of butterflies in Britain in a very accessible way for young children. My son loves this book and it has really helped him to look and identify caterpillars when we are out and about.

A great book for any children who love learning about nature.'

'It is told through a beautiful story as well as being informative at a level I can explain to my daughter.'

'I've set it up as a little display next to her caterpillar 'observation station' so we can read the story and dip in and out of the facts to identify which stage our caterpillars are at. We've since found caterpillars in our garden too so we will be watching to see what happens to them. The book is engaging for young readers and great to learn together.'
