

## Suntrap Book Review

### Ten Step Drawing: Nature

Written and illustrated by Mary Woodin

Published by Search Pres Ltd £8.99 (p/b)

**Age range:** For all ages

### Description

This book is a delight for adults and children alike. Beautifully presented with rounded edges and coloured borders.

If you love drawing plants and animals but don't know where to start, this is the book for you! 10 Step Drawing: Nature will help you turn simple shapes into beautiful nature images in just 10 steps.

Create 60 different flowers, trees, animals and objects, from a bird's nest to a cheeky harvest mouse, by following the very clear and easy instructions inside.

Learning to draw has never been so simple!

### Reviews

*'The book is divided into 3 different 'nature' themes including: 'Meadows and Wetland', 'Forest' and 'Coast'. The instructions and the layout of each drawing is really well placed and easy to follow. Each of the steps are numbered along with their corresponding instructional image and short textual instructions.*

*Under each title, there is a little extra info to inspire, encourage and inform! The final image is the largest image and I think that really helps for clarity so that you know what you are progressing towards. I also really like that the colour palette is at the end underneath the final image as it means you can focus on the actual mark marking in steps 1-9 before exploring colour in the final step!' Naomi Clarke*

*'The book includes information on over 60 different flowers, trees, animals and objects - starting with very basic lines and showing how to develop these, until you have a complete picture. This guide is the perfect way to start drawing, while, at the same time, building your skills and confidence.'*, Leisure Painter

*'Choose from British favourites such as the goldfinch, barn owl, dandelion, violet and herring gull. Each project takes one or two pages and demonstrates how to go from a basic outline adding features until you have the complete drawing. There are some lovely studies in here, and the book will serve as a starting point for anybody who wants to have a try at drawing nature.'* Rachel Hyde
