

Make a Deer

You will need:

- Different sized pine or larch cones
- Thin, forked twigs
- Pipe cleaners
- Glue and scissors
- Card (preferably brown)

(We used yellow pipe-cleaners so you can see)

1. Wind the pipe cleaner in-between the scales of the smaller cone, and twist the ends to secure.
2. Continue to wind the same pipe-cleaner around the larger cone and twist the ends again. Bend them out to make feet.
3. Wind the second pipe-cleaner around the back end of the body and bend out the ends to make the second pair of legs.

4. Tuck the twigs in-between the scales of the cone, at the back of the 'head' and glue to secure.

5. Cut some ears from brown card, tuck in-between the scales again, and glue to secure.
