

Waste

Enrich your Eco-Schools experience with climate learning and global connections for the whole class

Act Local

The fashion industry uses and wastes a huge amount of natural resources. Buying second hand clothes is one solution we can all do.

This resource pack from Eco Schools helps students run clothes/uniform sales.

Global Goals links

Think Global

Electrical items such as mobile phones contain precious minerals that are non-renewable and rare. These minerals are mined all over the world, often by poor people who are not paid fairly for their work. Recycling E-Waste at home and school is good for people and planet.

[Search The Pod for 'E-Waste' resources](#)

Climate Connections

If greenhouse gases emitted by wasting food were measured alongside countries emissions, food waste would be third biggest contributor to global heating. LEARN: UN Food & Agriculture Organisation ['Do Good: Save Food' resources for KS1 and KS2](#). DO: Get composting with this [info sheet from the RHS](#) and search their resources for more compost/soil activities.
